

# Guelph Wellington Paramedic Service Community Paramedicine Program

# **Capstone Project Proposal**

## **Mobile Integrated Health App**

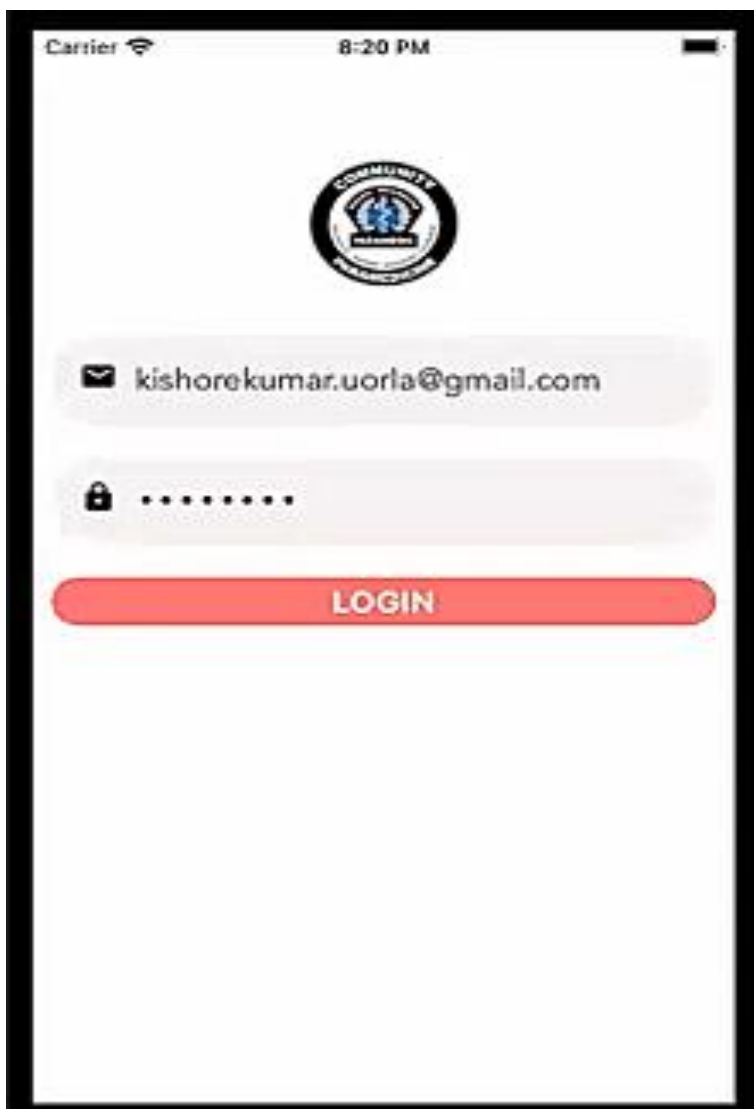

# Mobile Integrated Health App

- Due to increased funding and collaboration there is a need for centralized, standardized information for the Community Paramedicine team.
- Information must be easily accessible, have mobile availability, and be easy to update as information changes.
- Required information includes referral sources, contact information, clinical practice guidelines, and interactive assessment tools and scores.
- Solution must work on a variety of operating systems, including iOS and Android, as well as iPad.

# Goals and Outcomes

- Create a responsive and reliable tool for Community Paramedics to access information to improve their assessments and patient outcomes.
- Provide easily accessible contact information and referral options to Community Paramedics in the field.
- Develop a collection of clinical practice guidelines for reference as the Community Paramedicine scope of practice continues to develop.

# App Requirement

**LOGIN**

# Login Credential

## Main Page

Contact  
Resources  
Forms  
Manage

# Contacts

Ability to search  
Find the contact  
call or email with  
the default app

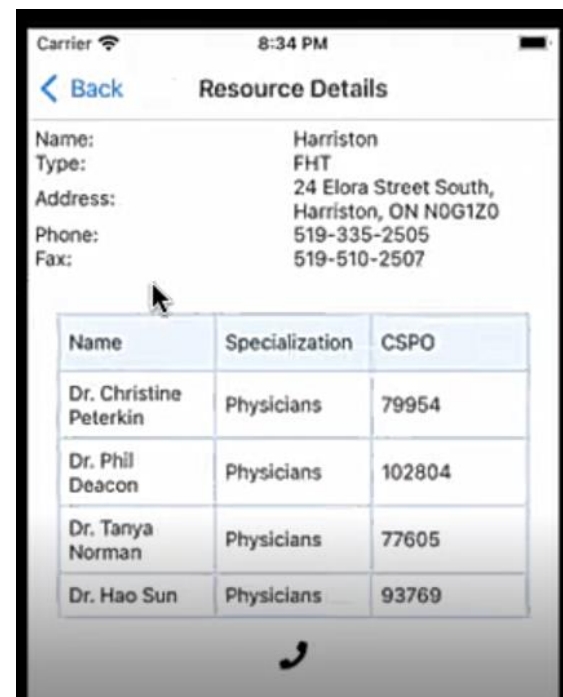

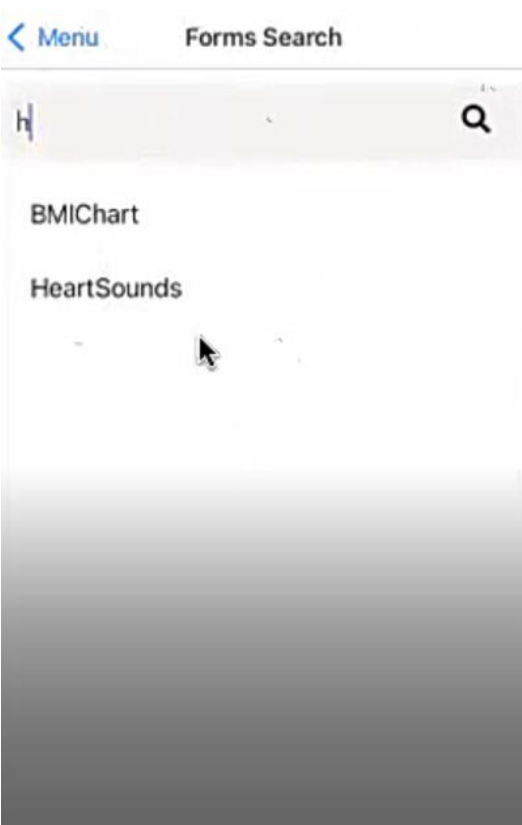

# Resource

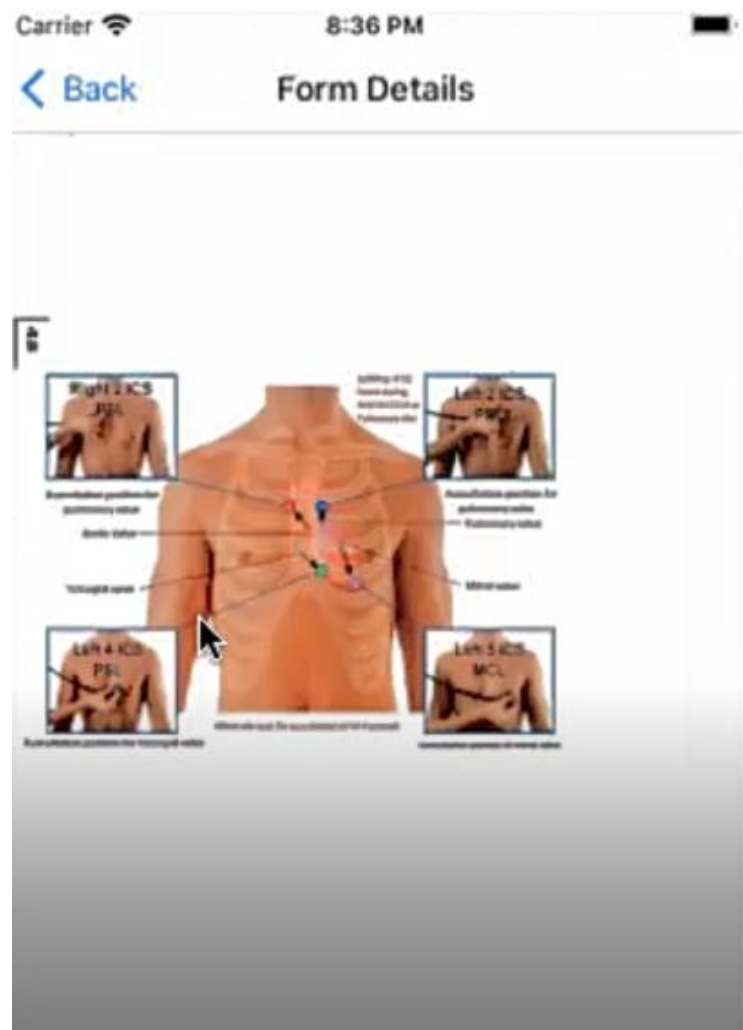

Ability to search  
Find the Resource  
and call

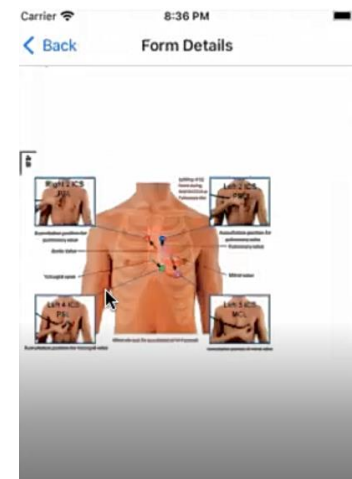

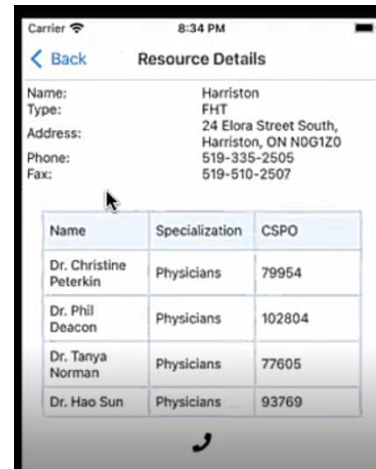

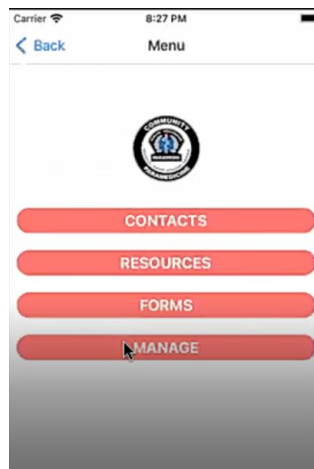

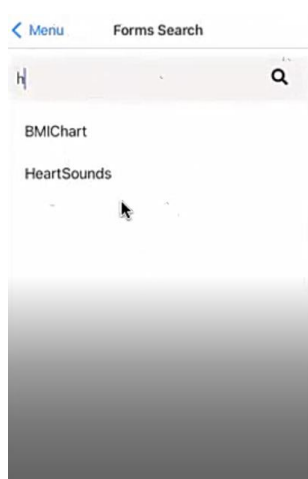

# Form

mostly medical  
guidelines to view  
when its needed

# Website

Should match the application Structure

Ability to upload material  
like contacts ,Forms and resource

# Thanks For Your Consideration!
